OVER THE YEARS

Commentaries based on cataloging over 300 sales
(including the Largest A.N.A. sale ever held-1977)
and 50 years collecting — since 1928.

Our Metropolitan Washington sale of July 14-15, 1978 was quite a revelation, or to be more accurate, a confirmation of what we realized was happening in numismatics. The BOOM is continuing and many new records were set in the sale. Since a number of dealers "reached" for the desirable items (helping set the records) to supply their clients, we know that prices for them at the coming bourses and price lists will be higher. The BOOM seems to be worldwide as we received a number of bid sheets from foreign countries with what we considered to be excellent bids, but most were exceeded by floor bidders. While top grade coins and currency brought record prices, we noted an increasing demand for nice circulated specimens.

The several days spent at the convention were most enjoyable, albeit a bit hectic with the rapid pace of the auction. It was nice visiting with Frank and Laurese Katen (chairman and co-chairperson of the convention) whom I have known and respected for a good many years. They have done an outstanding job for some time with numismatic books. Their experience and "know-how" made the convention an outstanding success. Frank even put off an operation so that he could devote his time to the convention. Among those who helped make the convention a success were the Clarkes, Miller, Pusey, Hoke, Wardlow, Aron, Magruder, Butland, Sullivan, Fox and Singleton. Most of whom have been involved for years.

Don and I both attended the International Currency Convention at Memphis in early June. The action there verged on the incredible. Some of the notes we sold Thursday night, we bought back Sunday at a "profit" to the new owners (dealers). Six weeks later, we were paying over 25% more for a number of notes. We cannot sell "theory", but only the notes we have available. Several of our clients have given us important want lists to fill — and some have indicated that they are willing to pay a premium to obtain them **Now.** Therefore, we are keeping an open mind to how "high" we are willing to go to obtain these notes. If you have considered disposing of your currency "some time in the future", then consider contacting us now — we are now paying "future" prices.

We also need choice Proof Gold, Early Gold, Pioneer Gold, Foreign Gold as well as regular copper, nickel, silver and gold coins in all conditions.

Numismatics is becoming increasingly sophisticated. Our library has doubled in size the last three years and the equipment needed to detect counterfeits, added or deleted mint marks, "processed" coins or notes, etcetera has proliferated. We believe the time has come when almost all collectors should avail themselves of the services of the A.N.A. (authentication service) and a professional numismatist. With proper advice and direction, you can maximize your efforts and investment.

JAMES F. LINDSAY
THE MAN AND HIS COLLECTION

James F. Lindsay's interest in coins began in the early 1940's. He became an avid collector of both coins and currency from an historical, personal and economic viewpoint. In fact, he assembled the largest collection of Kansas National Bank Notes and Kansas obsolete notes in existence (which we have acquired and are continuing to increase). His extensive historical collection of English and French gold contains a number of specimens which have not been offered in years. The many hundreds of U. S. gold coins include a number of the most popular from $1 to $20. The $2½ 1796 No Stars, 1796 Stars, 1808, 1833 PROOF, 1848 CAL. are particularly noteworthy in the series from 1796 to 1929.

The $3 from 1854 to 1889 include PROOFS as well as desirable dates. The $5 from 1795 to 1929 include exceptional specimens of 1796, 1799, 1813, 1814, 1818, 1820, 1823, 1861-D, PROOFS, etc. The King Farouk exceptional $10 1795 is followed by other early dates as well as PROOF and scarce later dates to 1916. The $20 Gold coins start with 1850 and extend to 1929, with an impressive offering of Carson City dates.

PRIVATE AND PIONEER GOLD, long one of our favorite series, contain some Extremely Rare and Desirable specimens such as: Bechtlers (several, only 2 or 3 in the hands of collectors), Moffat $5 and $10, Provisional U.S. Mint (Humbert & Assay Office) $10 - $20 - $50, Baldwin, Wass Molitor & Co., Fractional Cal. Gold, Mormon $2½ - $5 - $5 LION & BEEHIVE, and Clark Gruber $2½ - $5 - $10 - $20.

CURRENCY from $5 - $10 - $20 DEMAND NOTES to NATIONAL BANK NOTES include $1 to $100 LEGALS, SILVERS, COIN NOTES, FEDERAL RES. BANKS, 1914 FEDERALS, $5/$10 ("$15") ERROR, etc.

James F. Lindsay was born April 21, 1897 in Topeka, Kansas, where he attended Washburn University. After taking additional schooling at Columbia University in New York, he worked on Wall Street in the securities business. He later moved to Chicago where he joined the Chicago Securities Co. and the Central Trust of Illinois until the "Crash of 1929." Thereafter, he became a real estate broker until his retirement. His hobby now is "involvement with the church."

A FEW THOUGHTS ABOUT "JIM" LINDSAY

It is particularly gratifying to be able to offer "Jim" Lindsay's collection. I've known Jim over thirty years and recognize many "old friends" among the coins in the process of cataloging them. Jim was and is a "true numismatist." Each coin had a particular meaning, either historically or personally. Whether it bore the year of the opening of the Carson City Mint in 1870, or the date of his mother's birth in 1863, each coin "had a story to tell." The many stories Jim told me would "fill a book" — and I have asked him to do just that — write a "book of stories, with the coins as focal points." Jim, being 81 years young, has a remarkable memory and can recall incident after incident and many little known facts of history.

In assembling his collection of coins and currency (Jim built the largest collection of Kansas National Bank Notes) he became one of our most persistent buyers, writing "use your judgment" instead of a fixed amount for his bid. We were careful not to abuse his trust in us and now after some thirty-odd years, we have the pleasure and privilege of cataloging and offering this highly personalized collection. Hopefully, Don, or Don's son, Adam Michael, will have a similar experience some thirty-odd years from now in collections presently being assembled.

Jim "lived" history and researched the coins in order to properly tie them into the event or subject he wanted to "come alive." Isn't that what "Numismatics" is all about?

Now that Jim has decided to give others the pleasure of acquiring his historical coins, he has chosen to give the Coral Ridge Presbyterian Church of Ft. Lauderdale, Florida the proceeds from his coins to further "God's Work." Certainly a noble way to maximize the efforts of his life's objective.

We are most grateful to Mr. James F. Lindsay for his outstanding gift to Coral Ridge Presbyterian Church.

Of all the coin companies in the world, Mr. Lindsay recommended to have his collection sold by Kagin's Numismatic Auctions, Inc. Mr. Lindsay cited his thirty-year relationship with Art Kagin and the fine reputation that Kagin's Auctions, Inc. enjoyed in the industry as the reasons for this recommendation.

Coral Ridge Presbyterian Church is pleased to announce the selection of Kagin's Numismatic Auctions as its agent for the sale of the James F. Lindsay collection gift.

REGARDING ANA CERTIFICATION

FOR THE FIRST TIME IN RARE COIN AUCTIONS, KAGIN'S ARE PROVIDING COMPLETE AMERICAN NUMISMATIC ASSOCIATION CERTIFICATION OF YOUR RARE AND UNUSUAL COINS. We at Kagin's think that this certification service is essential in assuring the authenticity of the coins you purchase. This certification service guarantees you the genuineness of the material handled in a Kagin's Auction. **ALL OF THE COINS FEATURED WITH PHOTOGRAPHIC REPRODUCTIONS ABOVE THEIR RESPECTIVE LOT DESCRIPTIONS HAVE AN ACCOMPANYING ANACS CERTIFICATE AND COMPLETE DOCUMENTATION PHOTOGRAPHY OF THE COIN.** We are pleased to provide this service for our consignors at no extra charge.

The American Numismatic Association Certification Service, ANACS, is a branch of the federally chartered, non-profit, educational American Numismatic Association. The professional staff at ANACS examines and when necessary, will conduct non-destructive tests on numismatic material submitted for certification. The results of these tests are then furnished to the person submitting the item along with a statement of ANACS opinion concerning the authenticity of the coin.

All coins that are determined to be genuine, and the great majority of them are, are then issued a certificate of registration. This certificate records an identifying code number, a statement of authenticity and documented photographs.

Kagin's is the only auction company that offers this ANACS for all the major coins featured in our auctions. This is a valuable benefit that Kagin's is able to offer you. It protects the collector and the consignor. You will be able to take advantage of this essential service when you consign your coins to a Kagin's auction.

GRADING STANDARDS

We use Dr. Sheldon's numerical grading system for the grading of U.S. Coins. This is the system that has been used with great success by sophisticated numismatists for many years and now adopted by the A.N.A. We use the following abbreviations and descriptions:

POOR-1: Barely recognizable as to type.
FAIR-2: Showing minor detail.
AG-3: About Good-3, Rims worn down into lettering but interior detail will be visable.
GOOD-4,6: All interior outlines visable.
VG-8,10: Very Good 8 and 10, About 25 percent of the interior detail will be visable, date barely readable.
FINE-12,15: 30 per cent to 50 per cent of the interior detail will show.
VF-20,25,30,35: Very Fine 20 thru 35, 60 per cent to 85 per cent of the interior detail will show. 35(Borderline EF).
EF-40,45: Extremely Fine 40 and 45, 90 per cent of all interior details will show.
AU-50,55: Almost Uncirculated 50 and 55, Bare traces of friction at the highest points. 55+(Borderline Unc).
UNC-60: Mint State (MS) 60, strictly Uncirculated with no rub or friction, i.e. NO WEAR.
CHOICE BU-60+: Mint State (MS) 60+, a Choice Uncirculated specimen nicely struck and with nice lustre.
GEM BU-65: Mint State (MS) 65, a Gem coin in all respects. Fully struck. Only a bare minimum of minor abrasions.
Superb GEM BU-65+: Mint state-65+, If you look real hard with strong magnification you might find a flaw.
Perfect GEM-70: Mint State-70: Once in a great while a perfect coin is sold.
PROOFS & SPECIMENS: Proof and Specimen are methods of manufacture, not grades. All of our Proofs, Specimens, and Proof-Likes are graded in the same manner as our business strikes (examples: Proof-55, Proof-60, CHOICE Proof-60+, GEM Proof-65, SUPERB GEM Proof 65+.

HOW TO BID*

What to Bid On:

As you read through the catalog for the first time, record the numbers of all the lots you are interested in on a worksheet. If you are interested in specific types of coins, be sure to check the catalog index.

How Much to Bid:

The price you bid is determined by you. You must remember the value that you place on the coins. Check the values listed in the catalog and decide what you are willing to pay. You should bid generously on the lots you strongly wish to obtain. If there are some lots you would like to have 'if the price is right', then you may want to place nominal bids on those lots. Because a number of collectors choose to bid on many lots, the number of successful bids will be relatively small. This is controlled by a very active market. **You can safely extend your bidding** (and take advantage of a 'bargain') by placing a dollar total limit on your bids. Should your total be reached before all your bids are executed, we will then terminate your bidding.

Remember that your bids are limits. It is possible, and quite often does occur, that you will succeed in purchasing a lot for less than your bid since we start the floor bidding at about 5-10% above the second highest mail bid. Example: You bid $500.00 on the lot and the next highest mail bid is $400.00, we start the lot bid at $425.00. If there are no bids from the floor, you will then be awarded the lot at $425.00 - or if the floor bidding stops at perhaps $450.00 or $475.00 then you will receive the lot at a small advance above the top floor bid. If bidding continues above the $500.00, then that floor bidder will be awarded the lot.

How to Fill Out the Bid Sheet:

On the Bid Sheet you will observe that there are two different column headings. Lots and Bids. When you decide on the lots you want to bid on, enter the lot numbers under the proper column and the maximum amounts you are willing to pay for those lots in the proper column.

LOT	BID	LOT	BID
482	550.00		
517	900.00		
614	130.00		

If you have checked one of the increase boxes, you will be allowing us to increase your maximum bid in order to obtain the lot which is going for more than you had anticipated. We will buy the lots for you as low as possible as outlined in the TERMS OF THE SALE.

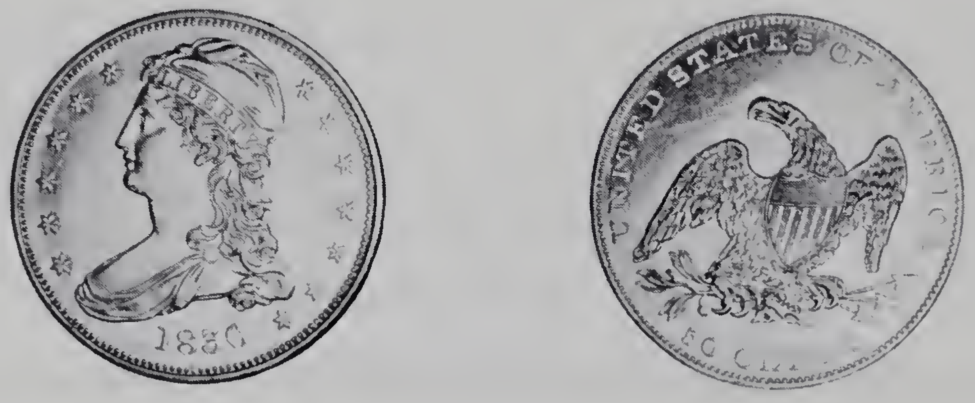
1836 REEDED EDGE PROOF 50¢



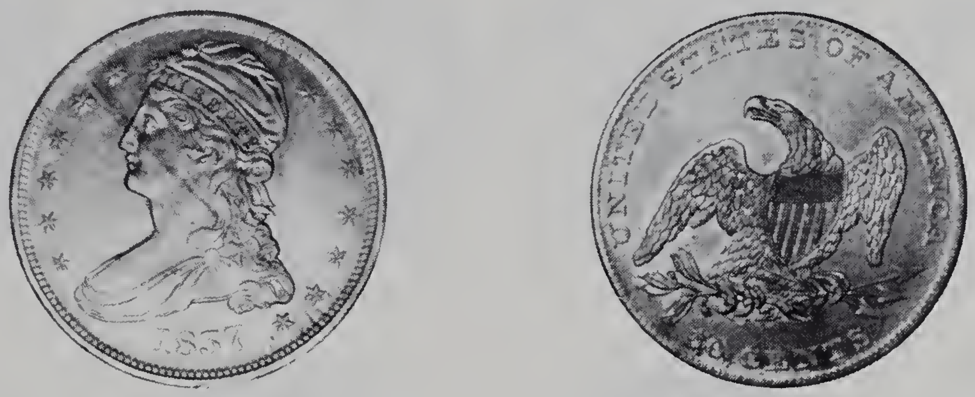
618. 1836 BRILLIANT **PROOF 60,** REEDED EDGE, 50 CENTS, Full mirror surfaces and all die characteristics for proofs (only one pair working dies used for proofs and business strikes). Proofs are identifiable by the shift in rev. die causing doubling on base of 50 CENTS. The doubling fades out nearing top portion of coin. Also characteristic die crack at last "S" of STATES which ends by top serif of "S". All uncirculated examples display much longer cracks. Of the 9 known Proofs, this coin would rank better than Parmelee, W.W. Neil, MacMurray, Terrell, and Judd coins but inferior to ANS, Norweb, Yale Univ. (stolen), and Paramount. The coin also displays lt. marks and scratches from contact with other coins, or just bad mishandling, so for identification purposes, we list the following marks; Obv. scratch on cheek and at end of curl in date, lt. marks below chin, near nose, opposite 11th star, on neck. Rev-lt. scratch from eagles beak to "E" in UNITED, lt. scratches above "'ERI" of AMERICA, lt. scratch at 8 o'clock near rim to eagles wing. A true numismatic rarity and a coin of major importance! Ex: our July, 1974 sale with PNG certificate. Surely this rarity now worth upwards of 5,000.

619. 1836 REEDED EDGE, 50 CENTS, **VF-20,** deeply toned. Only 1200 minted. Cat. 700. *PLATE*

620. 1837 "50 CENTS" **AU-50+** Some luster, planchet flaw at 8 o'clock on obv.

621. 1837 **AU-50+** . Wear on high spots. Lovely type coin!

622. 1837 "50 CENTS", Sharpness of **AU-50,** but scratch rt. obv.

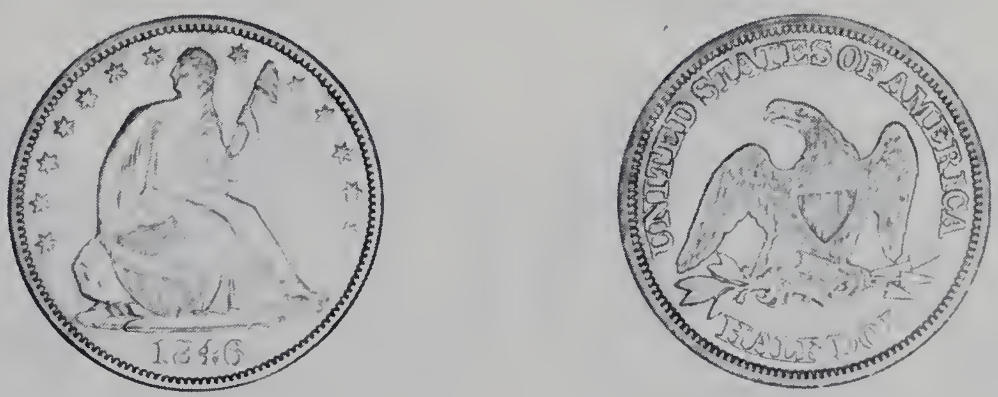


623. 1837 "BROAD MILL"(31 mm diameter) fine over heavy(wide) reeding, a faint rub from the "CHOICE UNC." grading formerly given it, lovely antique gold and rose. Scott lists it ***"R8?"*** without any price. Acquired as "EXTREMELY RARE" at $2,000; will be interesting to see what it now fetches.

624. 1838 "HALF DOL." **EF-45** sharpness but edge nick and dark surfaces.

625. 1839 BUST TYPE **AU-50,** lt. scratch near nose and bagmark on "I" of UNITED.

627. 1845-0 **MS-55-/60 DATE RECUT FAR TO LEFT** (original date clear at right), Scott lists "Recut R-7" but DOES NOT LIST THIS MAJOR VARIETY! Faint rubbing obverse with Prooflike reverse. Acquired as "EXTREMELY RARE" @ $1,000; present value 3 years later?



628. 1846/5 Choice **MS-60+** , SMALL DATE, Sharp struck, lovely iridescent toning. Die cracks (as described in Beistle) best evidence at knob-very tip of 5 shows plainly and striaght line across top of curve of bottom loop of 6. Equal, if not better than the one in our 1977 ANA Auction which fetched 1,000.

629. 1850-0 **AU-55** Sharp Struck with golden luster, lt. friction. Rare as many melted for silver in 1853. 400. *PLATE*

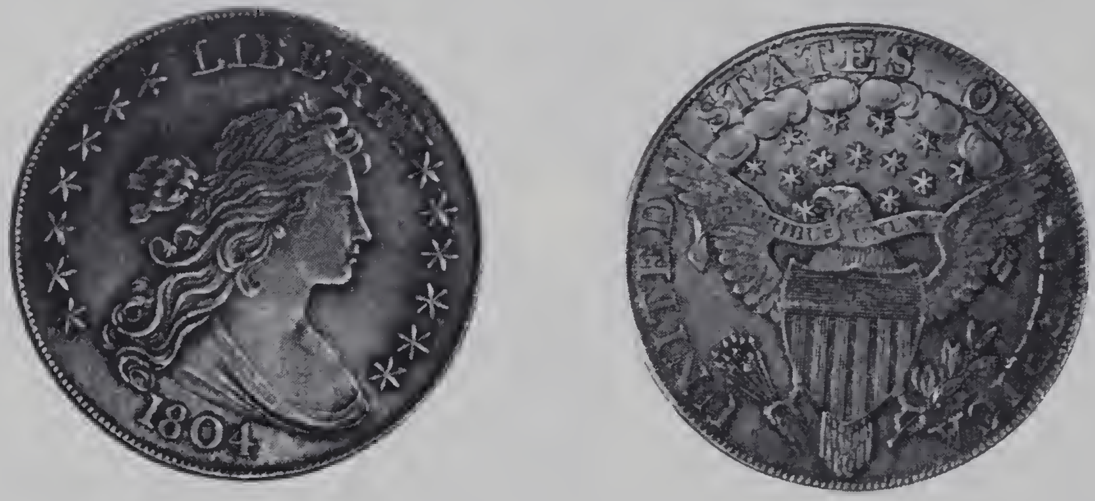
1804 SILVER DOLLAR



"THE KING OF AMERICAN COINS"

708. 1804 SILVER DOLLAR. "In all the history of numismatics of the entire world, there is not today and there never has been a single coin which was and is the subject of so much romance, interest, and comment and upon which so much has been written and so much discussed as the U.S. dollar of 1804".

This particular specimen is the Silver-Plated Electrotype MADE IN THE PHILADELPHIA MINT BY W. E. DU BOIS. The last appearance of an electrotype 1804 dollar was the one we sold in our "Sale of the 70's" in 1973 at $10,000. Previously, one was sold by the New Netherlands at their 53rd Auction June, 1959 and described:

"1804 SILVER DOLLAR. COPPER ELECTROTYPE MADE IN PHILADELPHIA MINT BY W. E. DU BOIS, FROM THE MINT'S PLAIN EDGED RESTRIKE (CLASS II, now in the Smithsonian). "COPY" under right claw. Full original sharpness. Listed as A. W. 26(Adams & Woodin Book on U.S. Patterns, Trial, and Experimental Pieces and described as "UNIQUE"; published 1913. Now replaced by Judd's book on patterns and also described therein). A Copper Trial Piece (Adams never examined it); Listed as No. 5 by the late B. Max Mehl in his enumeration of 1804 dollars supplementary to his 1927 reprint of Hazeltine's Type Table OBTAINED FROM W. E. DU BOIS AT THE MINT, CA 1860, by Dr. Spiers; the Spiers collection was bequeathed to the Society of California Pioneer, and a catalog issued around 1877; the Society exhibited the collection at the San Francisco Mint late, CA 1906, the collection was broken up, Waldo Newcomer obtaining this piece among many others; Newcomer left it to his son, from whom Mr. Straus obtained it. Mentioned on page 172 of the 18th edition of the Standard Catalogue as "THE ONLY ELECTROTYPE WE HAVE EVER SOLD AND THE ONLY ONE WE EVER EXPECT TO. Valuable for its historical interest."

We do certainly agree with New Netherlands and feel this electrotype is very valuable for historical interest.

Description! This specimen is a lovely silver-plated electrotpye with excellent colour and surfaces. The sharpness is incredible! Incredible detail in stars, letters, curls, etc. as this specimen was electrotyped from the U.S. Mint coin. No "Copy" under claw.

The genuine 1804, if offered today, would command over $200,000. As a "mint issued 1804 Dollar", we expect this piece to well exceed the $10,000 paid for the last one offered in 1973.

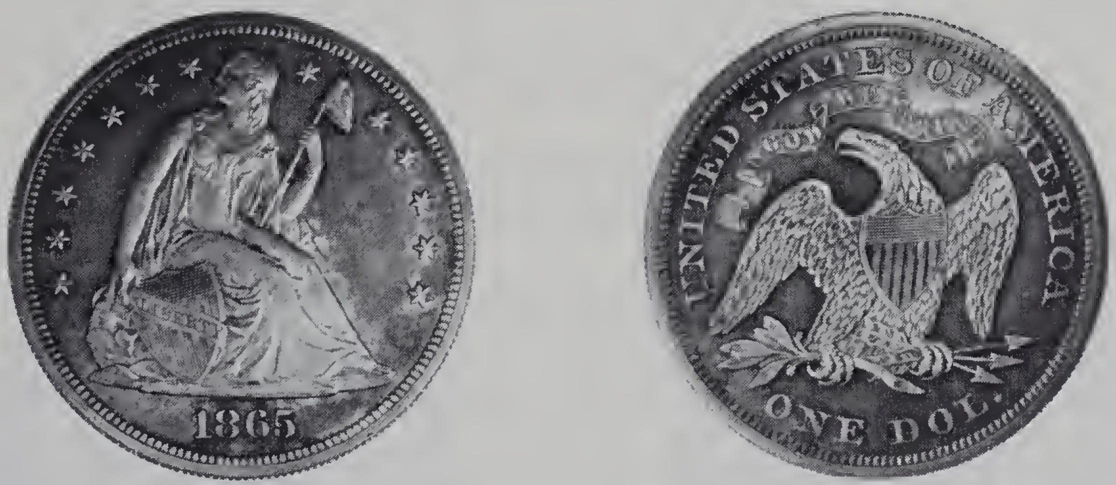
1865 TRANSITIONAL "WITH MOTTO" DOLLAR



719. 1865 J-434, Absolutely gorgeous as the coin shows every colour of the rainbow on the obv. and rev. Shows no sign of cleaning or mishandling and has no defects. The obv. shows the REGULAR DIE of 1865, Rev. shows the adopted design of 1866 WITH MOTTO, "In God We Trust". In an early Mason & Co. Sale of June 1870, it is listed that only 5 were struck in silver. It is listed in the Judd Book as R-7 (4-12 struck). Record 1976 ANA sale $10,000; surely this remarkable specimen now worth more.

The Guidebook lists the 1866 Transitional No Motto(2 known) but has not as yet included the 1865 Transitionals. Should these be included, the additional strong demand would greatly enhance their value. Judd lists the Delp Sale (1972) 1866 No Motto bringing $32,500 but since then we recall seeing a specimen at $75,000. It will be interesting to see what this lovely 1865 Transitional now fetches.

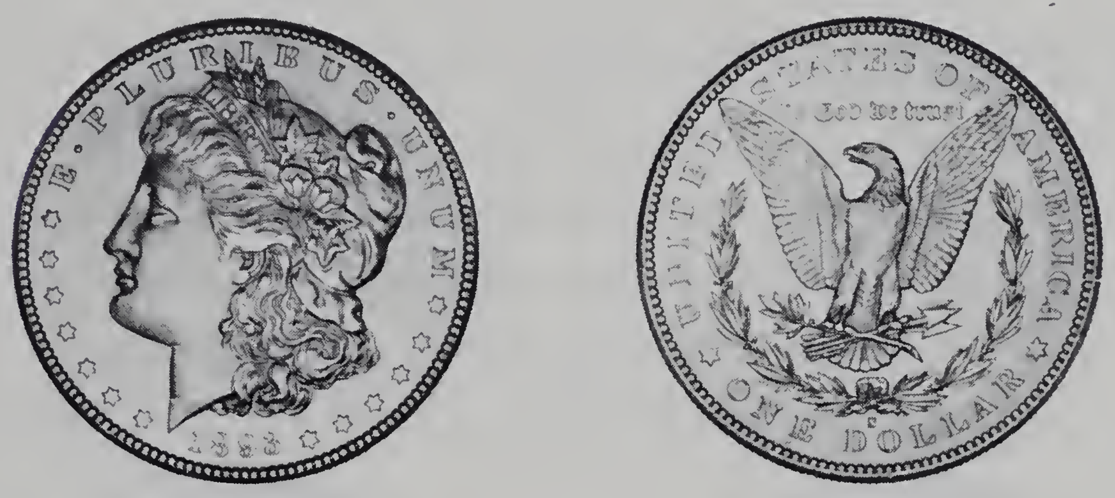
THE “FINEST KNOWN” 1893-S PROOFLIKE GEM DOLLAR



783. 1893-S Semi-Proof-like **GEM BRILLIANT UNCIRCULATED-65**! Virtually fully struck up in all areas, all breast feathers showing. Full lustrous cartwheel effect over entire coin with shining satin surfaces. All diagnostic marks and characteristics are exhibited on this coin. Crack starting at 1 of date through tip of bust to 2nd star, and UM to 10th star. Rev. die cracks around legend.

Wayne Miller in his book “AN ANALYSIS OF MORGAN AND PEACE DOLLARS” described the coin which fetched $35,000 at Paramount’s Greater N.Y. 1974 Sale; this coin, however, was marred by a series of hairline striations across the face”. Miller describes this specimen as “purchased by John Love and Joel Rettew in 1974 and traded a prominent Washington collector for $42,000 in other coins. “Of the dozen or so mint state 1893-S dollars which have appeared in the past four years, about one-half were semi-prooflike. Such pieces have usually been advertised as being fully prooflike. Other than the Love-Rettew specimen, they have not evidenced good luster, and were not generally as attractive overall, frosty specimens. However, because of the current fervor for prooflike dollars, such semi-prooflike pieces have usually commanded the higher price. The author has never seen a fully prooflike 1893-S dollar.”

There you have it - ***“THE FINEST KNOWN 1893-S DOLLAR”!*** It cost $42,000 in 1975 (PNG certificate from that sale accompanies the coin and should certainly now fetch somewhat more in the present strong market. Who knows when the opportunity will again present itself to acquire“THE FINEST KNOWN”.

784. 1893-S **Sharp EF-45 bordering AU-50, traces luster.** RARE. Trends AU-50 @ $5,000; this worth proportionately.

792. 1895-S **GEM BU-65!** Lustrous fully satin-like surfaces. Full frost is evident on face and hair. Lt. marks in field, but minimal. Very Sharply Struck with characteristic tilted, open mintmark. Lovely, attractive and virtually SUPERB! If this incredible specimen were in our stock, we doubt if it would remain there very long at 5,000.

The later dates 1900-1904 having full proof-like surfaces over entire coin (none exhibiting halo or cameo effects). This coin is fully proof-like with SHARP WIRE EDGE and almost fully struck up hair. Some very lt. marks are noted in field and devices and one near mint mark. These certainly do not distract from appearance of this lovely coin. VERY RARE and not often available at any price in the numismatic markets. Should set a new record!

COLONIALS

Between 1652 and 1682, Massachusetts, against the judgment of the Crown of England, struck its own coinage. Connecticut, in this period, used human labor in lieu of taxes, payments, etc. In New York, use of tobacco, or beaver skin were used for payments. Spanish monies dominated the finances of the colonies, but any kind of coinage was welcomed and accepted. I. E. English Halfpenny, counterfeits, etc., were basically used. Overall, coins, counterfeits, sheep tobacco, and skins were all used during the infancy era of the new colonies.

Coins produced prior to about Mid-19th Century cannot be judged by the same standards as later issues; pieces produced by hand or horse power seldom are as well-centered or struck as later ones.

Massachusetts "New England" Coinage

1567. 1662 **Oak Tree,** TWOPENCE, Noe 33, **Choice Extremely Fine-45+** , Sharp Struck and Well-Centered. Better than the REDBOOK plate coin! Well worth $3,000 in this remarkable condition. Ex: Laird Park 5/76.

1568. 1662 **Oak Tree,** TWOPENCE, Noe 31?, basically Extremely Fine but two holes, planchet crack at edge. Possibly carried by Indian as "magic charm". Acquired 2 years ago at 150.

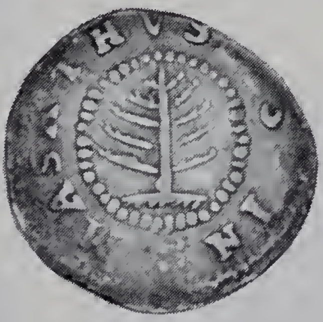
1569. 1652 **Pine Tree** Threepence, Noe 34, Fine but holed through "1" in date. Rarity 4. Cat. $375 fine; this worth?

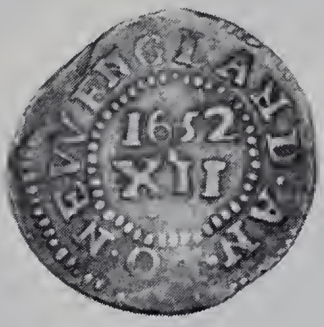
1570. 1652 **Pine Tree** Threepence, Noe 36, Ext. Fine Sharpness but small plugged hole through ring of beads and tooled. EF worth around $1,200; this one worth?

1571. 1652 **Pine Tree** Shilling (small); Noe 17, **F-12,** Sharpness of VF but has usual weakness at top for this variety. Clean surfaces with some natural toning. Attractive. Cat. VF $800; this worth? *PLATE*

1572. 1652 **Pine Tree** Shilling (small); Noe 16, date side Strong F-15, tree side Sharp VG-10, well-centered and nice strike but cleverly repaired and tooled AS. Cat. $475 Fine; this worth?

1573. 1652 **Pine Tree** Shilling (small) Noe-20(Rarity 7), Sharp **VG-10** but worn spot at W EN, light porosity with light old pinscratches. Well-Centered! 750. *PLATE*





1574. 1652 **PINE TREE SHILLING,** small planchet, Noe 25, date side Well-Centered and Sharp Struck with entire legend quite sharp and clear, pine tree side with 90% of legend sharp and clear. A superior specimen very close to Extremely Fine. In fact, better appearing than most "Extremely Fine" specimens we have seen offered over the years. RARE. Surely this highly desirable example worth 1,500.

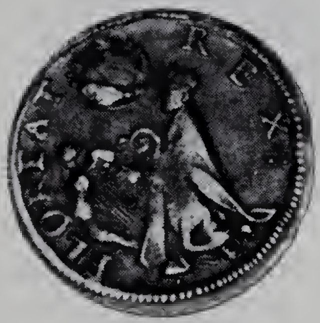
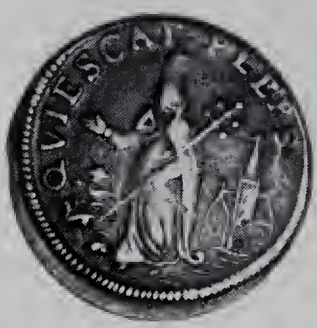
Popular as the first coinage in what is today the U.S. Most survivors appear to have been "trimmed" (for the silver), bent, holed, etc. Some were worn as charms or buried with the Indians. many were mutilated as "Witch's Pieces". That any survive in decent condition is indeed remarkable.

1575. 1652 **Pine Tree** Shilling (small), curved branches, nice Fine-15 with most of legend visible. Cat 475.

(1681) ST. PATRICK COINAGE

These pieces were struck during the Charles I reign, by Briot, who was the chief engraver at the English Royal Mint. Briot's work is evident from letter punches, the harps, the use of a martlet, and edge reeding that he used on Scottish coins. The St. Patrick's coinage were struck around 1645 but later they were legally stopped from circulating. But in 1681, large quantities were brought to New Jersey by a Quaker named Mark Newby, and through the New Jersey legislature, became legal tender in this country. The following specimens are of tremendous importance because they have never appeared together before at any auction! A chance in a lifetime opportunity.





1576. ST. PATRICK Farthing (Mark Newby) MARTLET (Bird) UNDER KNEELING KING, Reeded Edge. Lovely chocolate brown planchet with FULL EDGE DENTICLES. Sharply struck with all details strong. Scott's Catalogue (C-333) does not list above VF. The last appearance of this type was the Massachusetts Historical Society specimen which was sold by Stacks March 29, 1973, (lot 8) and later sold again in the 1976 ANA Sale, (lot 18) as VF at $750. In our opinion, it seems that only that piece and this present specimen, are the only two to appear at auction in the last decade. Since the present coin grades **STRONG VF-35,** a full half grade better than the MHS specimen, it could very well be the ***FINEST KNOWN!*** Interesting die cracks at the "T" in FLOREAT to "E" in REX; Also, there is a crack from "S" in PLEBS to rim. There are also some light scratches below "T" in FLOREAT which are hardly noticeable, but mentioned for identification purposes. The brass plug is almost invisible. A perfect companion piece for the other rare varieties included in this sale. Easily worth $1,500.

1577. **ST. PATRICK** Farthing (Mark Newby) EXTREMELY LARGE SLANTING FIGURE 8 (Double Annulet). The type of Scotts' C-334, but with an extremely large slanting 8 under the kneeling king. The present coin grades **VG-8** with usual wear. Almost perfectly centered, which is unusual, as these coins are notorious for being struck off-center. Brass plug present and showing. Some obv. marks in center, mentioned for identification purposes. ***POSSIBLY UNIQUE!***

This type, as far as this cataloguer can concieve, can only be traced to one other example: This being the Spinks specimen, March 1976, described as, "Good, with piece missing from the flan—at 185# ($400)!" THERE ARE NO OTHER APPEARANCES THAT WE KNOW OF EITHER AT AUCTION OR PRICE LIST! Very rare! Surely worth $3,500 or so.

1578. **ST. PATRICK** Farthing (Mark Newby) MARTLET (Bird) and DOUBLE ANNULET (Figure 8) UNDER KNEELING KING. Scotts' Catalogue (C-335) lists this variety as **HIGH RARITY 7 (4 to 6 known).** The present specimen grades **VF-25** and sharp and is the ***SECOND FINEST KNOWN*** next to the Johns Hopkins Univ. coin which grades VF-35. The double annulet or figure 8 suggests date of 1648. The martlet below king design is suggestive of Briot's work at the Tower Mint in England.

The colour is a nice chocolate brown with nice even surfaces. Brass plug is totally visible. The Taxay plate coin, which grades VF-20, is weaker in strike and from a different obverse die than the present coin.

For identification purposes, we mention a small vertical old scratch on the obv. from "R" in REX to below the "E" in REX. Will enhance any Colonial collection and should set a new public auction record! Well worth over $3,500.

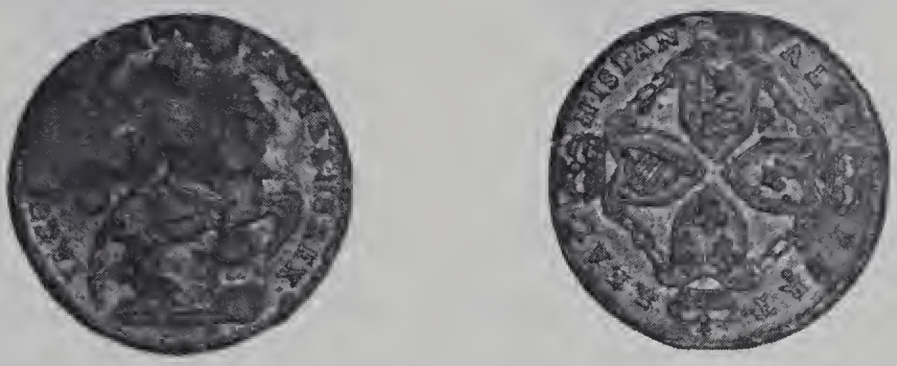
1579. **ST. PATRICK** Farthing (Mark Newby) WORM AND MARTLET UNDER KING with MARTLET STRUCK OVER FIGURE 8. By close scrutinization, the martlet is clear, but with an annulet at bottom. The upper half is either weak due to strike or chemical reaction of the metal. The present coin grades **G to VG** with no major problems, just nice even wear. Some light porosity is present, but overall, does not affect appearance. Chocolate brown in colour. Brass plug is completely invisible. ***UNIQUE.*** Very rare and a chance to own a unique U.S. Colonial that probably will reside in a collection for decades. NO OTHER APPEARANCE IN ANY MAJOR AUCTION! Easily a strong four figure coin.

1580. (1681) ST. PATRICK Farthing, **VF** with some porous spots and planchet defect at head and crown (missing brass plug?), nice color, die break over EBS. Cat. VF 275.

1581. (1681) Similar farthing, king side VF/St. Pat. VG. Cat. Fine 150.

1582. 1688 Plantation Token, affected by "tin pest" and has deterioated the coin, uncorroded part Fine. Cat. F 175; this worth about half.

Richard Holt's American Plantation Token



1583. (1688) 1/24 Part Real, ET HB REX (normal have HIB) variety listed in Scott as C41, ***HIGH R7 (ONLY 4 TO 6 KNOWN)!*** No indication of value due to its GREAT RARITY and no records in recent years. Basically **Extremely Fine** with some rust spots (typical of nearly all original specimens seen of the more "common" varieties -we do not recall seeing another specimen of this great rarity). Easily worth several thousand dollars. Where could you obtain another?

Well-Centered! Lovely lustrous olive brown. We had to go back to 6/73 to fine comparable specimen, which realized 1,300. Judging from what has happened to "Colonials" in the intervening 5 years, we would be surprised if this remarkable specimen fetches less than 3,000.

ET LIB.
1785

1640. 1785 M. 34.F2 (R-3) so-called "ET LIT" variety, base of "B" open. **EF-40** in sharpness with full drapery lines, some weakness on globe. Lt. chocolate brown obv., shade darker on rev., usual lt. planchet defect(most obvious being below bust & through "L" on LIR). Somewhat better than Miller plate coin, Appleton-MHS-Stacks 1970, Bryant-Stack's 1973, New Netherlands 60th, and Vlack plate coin. Not as fine as Pine Tree 2-15-75 as Finest Known. This being close to that coin, is perhaps SECOND FINEST KNOWN! 600.

1641. 1786 M. 5.7-0.2, Rarity 6, Well advanced die break over "C", ornamental base of shield broken away, B touches shield. Unusual even strike for this variety as these were struck from rusted dies, (around face on rev); and on granular planchets. Sharpness of EF but overall, a pleasing **VF-30** in grade; Only 2 available in last 15 years; Miller plate coin VF-EF from Bowers Aug 1972 list, and Pine Tree EAC coin at F+. This coin probably closer to **R-7** from frequency of appearance. 400. *PLATE*

1642. 1787 M. 1.1-A (R-3), SMALLEST HEAD, Rev. "ETLIB INDE", Overall **F-15** with sharpness up to EF but evidence of pitting on rev. with granular surface on face of obv. Otherwise smooth, lt. brown surfaces. notable sharper than Miller plate coin, Taxay plate coin, Appleton-MHS, F.C.C. Boyd and JHU. Better sharpness than lot 145, Merkin Oct 1973 sale at $400. An outstanding example of this type coin. 450. *PLATE*

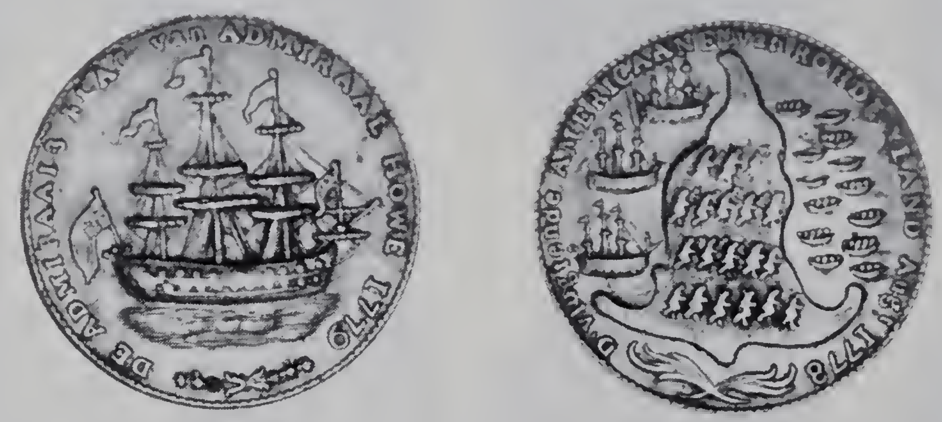
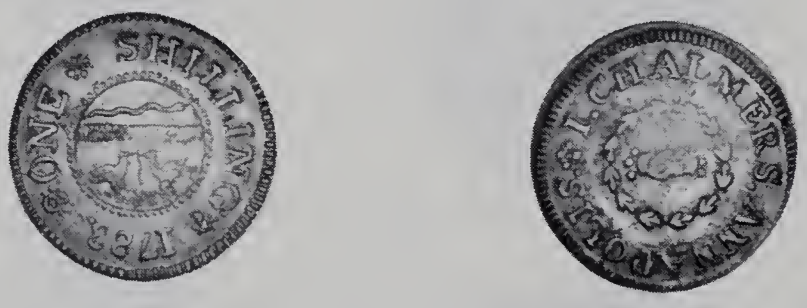
1776-1779 Rhode Island SHIP MEDAL In Pewter

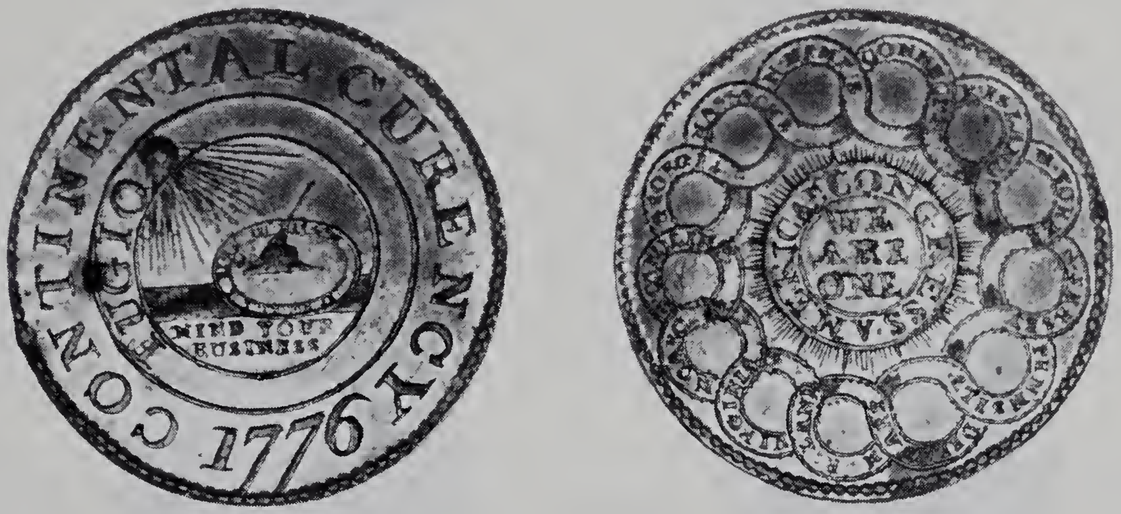


1770. 1778-1779 RHODE ISLAND Ship Medal, Wreath below ship, struck in PEWTER, **About Uncirculated-55,** quite sharp with only slight friction on high points. *Scott states "ONLY 2 KNOWN",* 1) JHU(John Hopkins U.); 2) NN sale, Nov. 1956. We have no way of evaluating this popular type piece since it is THE ONLY SPECIMEN AVAILABLE TO COLLECTORS! The three "experts" we contacted for an opinion concerning its value appraised it at 5,000; 10,000; and 15,000. We do not know what frame of reference they used to arrive at these prices, but it will be interesting to see which come closest to being correct.



1771. 1783 "CONDITION-CENSUS" CHALMERS SHILLING Long Worm variety, **BORDERLINE UNCIRCULATED** obverse with FULL SHIMMERING BLUISH-GOLDEN LUSTER, WELL-CENTERED WITH COMPLETE SHARP EDGE DENTILATION! Rev. almost fully centered, About Uncirculated with luster, part of wreath and clasped hands show more friction (from being slightly higher than balance of coin and therefore wearing more?), possibly from movement in old-time coin cabinet. *Scott states* ***"HIGH R6"*** -ONLY ABOUT 15 OR SO KNOWN! Certainly "HIGH IN CONDITION-CENSUS". Listed conservatively (for such a rarity) in Guidebook at only $400 Gd & $1,250 Fine; unpriced in higher grades due to rarity. Acquired 1976 as "One Of Finest Known" at 7,500.

FINEST KNOWN SUPERB PROOFLIKE
CONTINENTAL DOLLAR



1772. 1776 CONTINENTAL DOLLAR, CURRENCY (with one R), American Congress-We Are One, 13 links with names of each colony on a link; STRUCK IN PEWTER: this is THE FIRST SILVER DOLLAR SIZE COIN PROPOSED FOR THE UNITED STATES; **SUPERB GEM PROOFLIKE 65+** with slight patina; absolutely astonishing surfaces without the usual major abrasions, characteristic of these large size and soft pewter coins; We list a tiny spot on G of FUGIO, for identification means. Fantastically SHARP in STRIKE with full proof-like fields.

The story behind the continental dollar is quite interesting. The need of such a coin was a necessity to support the paper currency and credit, and to necessitate purchases to continue the Revolution. Silver was almost impossible to obtain during these times, so the members of the government decided on high quality pewter.

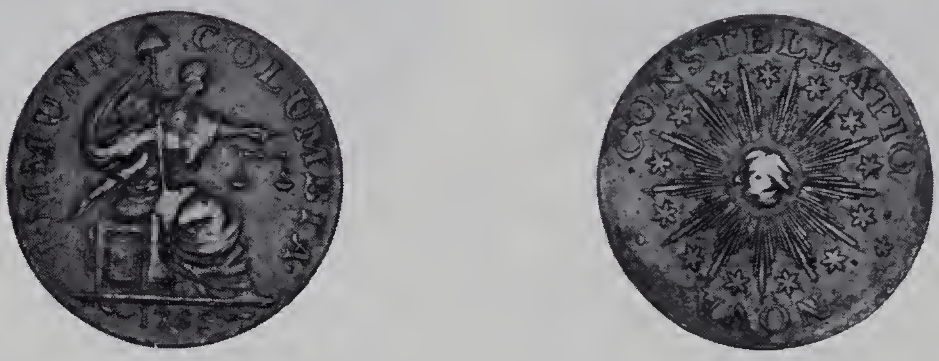
Conclusions of many who research numismatics, is that these large coins would be issued to help phase out the One Dollar paper currency in the middle of 1776, and that this was the first coin of the United States of America.

Most historians feel that the silver dollar General Washington had thrown across the Potomac River near the end of the Revolutionary War, was a Continental Dollar.

From the famed "GABLE SALE", of S.H. Chapman in 1916, plate 2, as a SUPERB PROOF, and FINEST KNOWN, it was bought by Dr. Allenburger and later sold in 1948 when his collection was combined with King Farouks in Mehl's Sale, Lot 1935.

This coin has evidently been sitting in the same collection since that time and now brought out to light for the connoisseur who has been waiting for a chance in a lifetime to own "THE FINEST KNOWN CONTINENTAL DOLLAR"! (Original box enclosed), Superior to the specimen in our 10/76 sale which fetched 16,000. Surely this remarkable specimen worth substantial more.

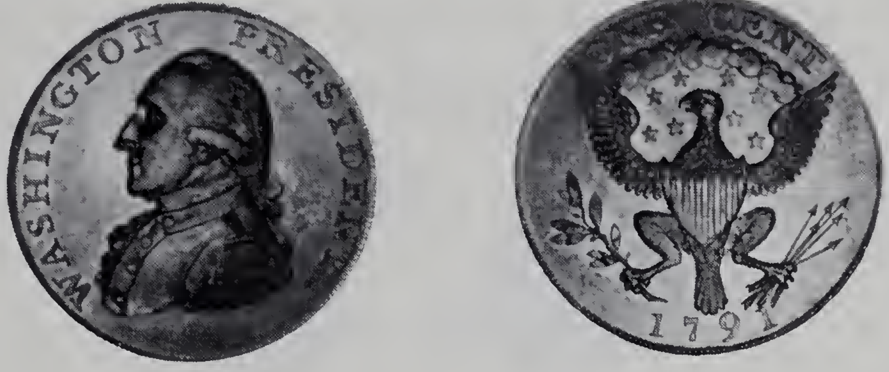
1785 IMMUNE COLUMBIA/NOVA CONSTELLATIO



1773. 1785 IMMUNE COLUMBIA/NOVA CONSTELLATIO, extra star and period at border with 13 stars between rays, SHARP FULL STRIKE WITH EDGE DENTICLES VISIBLE! Nice brown with light friction on highest points: **Sharp Extremely Fine** obverse with a few minute contact marks on surface. **ABOUT UNCIRCULATED** reverse with friction on high points of center device. Ex. Brock (University Pennsylvania) collection. The last record we could find was 6/73 Stack's described as uncirculated with peculiarly beveled edges, planchet defect, very light edge nick and a few pinpoint dark stains. Called there finest known or 2nd finest. Comparing this specimen with the photo there, we believe THIS COIN IS MORE AESTHETICALLY APPEALING. We believe the HIGHLY SUPERIOR EDGES is the main factor.

That coin realized $35,000 in spirited bidding. Since then, many new records have been set. The next lot in the June, 1973 Stack's sale was a Very Fine INIMICA 1785 TYRANIS/CONFEDERATIO which fetched $30,000. It reappeared in Stack's 5/76 sale where it fetched $47,000 after spirited bidding. Surely this **highly desirable rarity,** in the present strong market, should fetch well over $50,000. In fact, it was acquired in 1976 (outright purchase) at close to that.

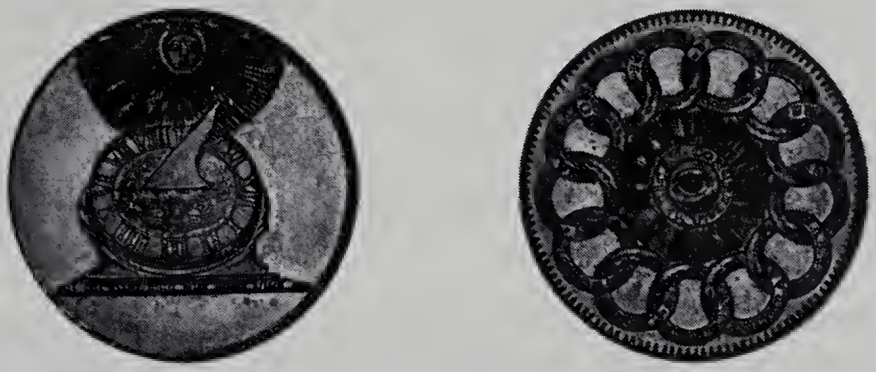
1791 SEMI-OFFICIAL ESSAY WASHINGTON CENT



1774. 1791 WASHINGTON PRESIDENT/ONE CENT over small eagle, Baker 16, lovely **PROOFLIKE** bluish brown with hint of red in letters! An exquisite specimen worthy of the finest collection. Much rarer than the 1791 large eagle. Surely worth at least as much as the specimen reported to have sold at 1,500.

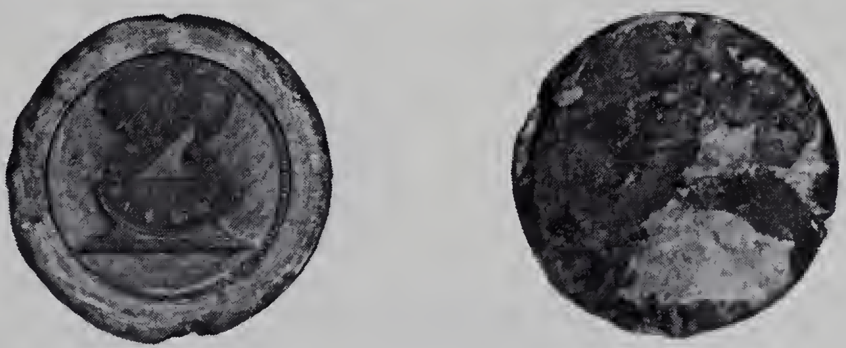
Struck by Birmingham coiner Obediah Westwood from dies by John G. Hancock in an attempt to obtain the coinage contract from the U.S. Specimens were presented to President Washington (perhaps this unusually choice one) and other U.S. officials but Congress determined to have its own coinage.

1787 Fugia "Pattern" Cent — Excessively Rare



1775. Newman 101-BB, Crosby 2-A. COPPER. Sun, rays and sun dial but no date, etc. Rev. 13 rings, each WITH NAME OF A STATE and "AMERICAN CONGRESS." on label, etc. Struck perfectly on a perfect planchet, **UNCIRCULATED RED BLENDING TO LOVELY BLUISH BROWN, GEM-65!** Crosby states (page 300) "other pieces, supposed to be patterns, etc." Newman's "Varieties of the Fugio Cent" also refers to these as patterns. Others are of the opinion that they were struck later (1860's?). Ex. U. of P., as were the Brass and Silver in Stack's 3/15/75 sale wherein they state: "TO THE BEST OF OUR KNOWLEDGE NO SPECIMENS OF ANY METAL HAVE BEEN OFFERED AT PUBLIC AUCTION IN THIS CENTURY." We believe the copper is the most desirable, as being in the "original metal". The brass there (Stack's) realized $3,100 and the silver (2 known) fetched $4,300. Now, 3 years later, it will be interesting to see what this desirable and popular rarity fetches in the present strong market.

UNIQUE 1787 Fugio Pewter Hub Impression



1776. OBVERSE HUB IMPRESSION IN PEWTER of newman 102 variety with only radiant sun and sun dial below (no inscriptions). In large plastic display holder. **UNIQUE!** Valued at $3,000 and $5,000 by two leading authorities. if the term "chance of a lifetime" is applied, then surely this would qualify.

With the discovery of large gold deposits in Georgia and the Carolinas during the late 1820's bringing in large amounts of gold to the Treasury, Congress passed the act authorizing Gold dollars and Double Eagle(act of March 3, 1849). $2½ GOLD (QUARTER EAGLES)

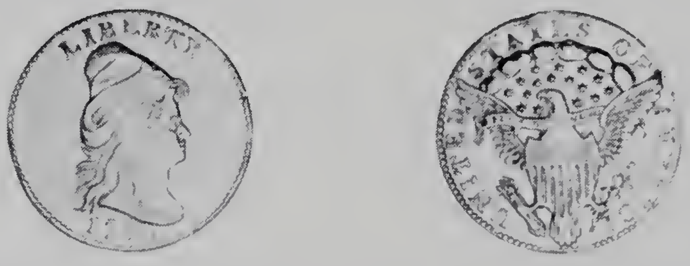
Quarter eagles were authorized by "the mint act" of April 2, 1792. The design of the first type, 1796-1807, was placed into the dies by Robert Scot, the designer. The reverse of the coin showed the eagle-copied from the Great Seal of the United States. The designs which followed proved to be less attractive with less detail, possibly causing the denomination to be less popular. Quarter eagles were discontinued by the Act of April 11, 1930 after some twenty million had been coined.



1813. 1796 NO STARS obverse, **VF-25.** Ex: Paramount Nov. 1967 as "VF with faint edge nick and beginning of die break at edge behind bust." Actually, has 2 lt. edge nicks and also a crack developing from "E" of LIBERTY to hat. Double cut nose. Weak struck in central portions, lt. hairlines, tiny portion reeding at left has been "strengthened". Listed in AKERS 2½ Gold Book under EF (WGC 1946), and VF Paramount 11/67. $5 GOLD (HALF EAGLES)

When the Board of Treasury was making plans for a mint and a coinage system, Alexander Hamilton recommended that coins of gold and silver be in a proportion of eleven parts of pure metal to one part alloy. This yielded a ten-dollar coin ("eagle"-from the eagle on rev.) weighing 270 grains of gold, 916 2/3 Fine. This was adopted by the Mint Act of 1792 and included a coin not mentioned—-the half eagle. It proved to be more convenient, as it was close in weight to a British guinea. The eagle and half eagle were our earliest gold coins, followed the next year by the quarter eagle.

Reverse has 4 berries on wreath, inner one lower than rest, spurs from border between "S" and "O". Rust marks after "F". Rarity 4. Sharp with high wire edge. $10 GOLD

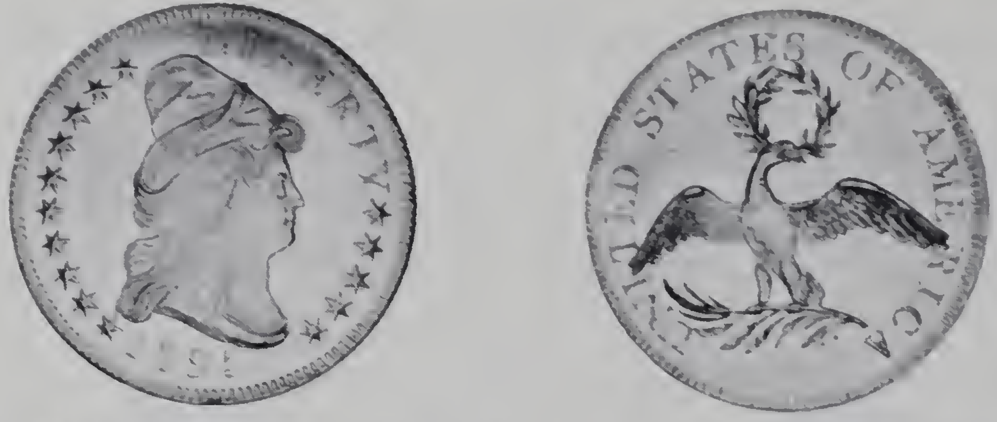
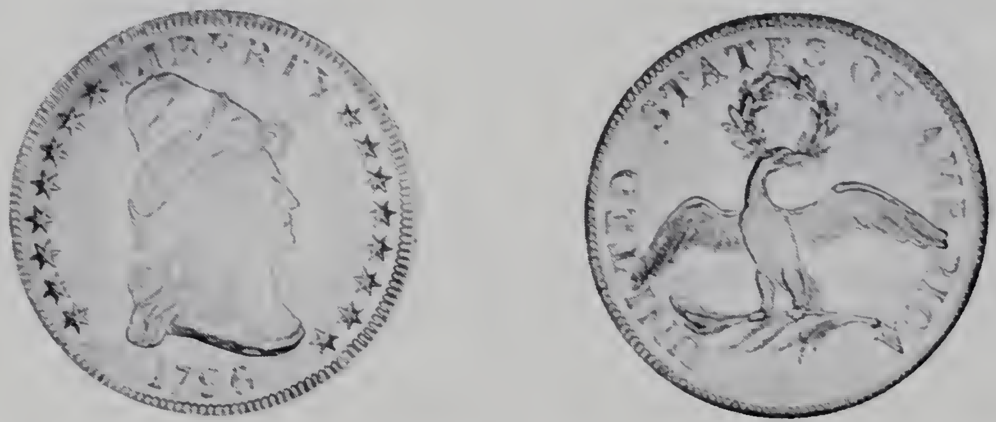
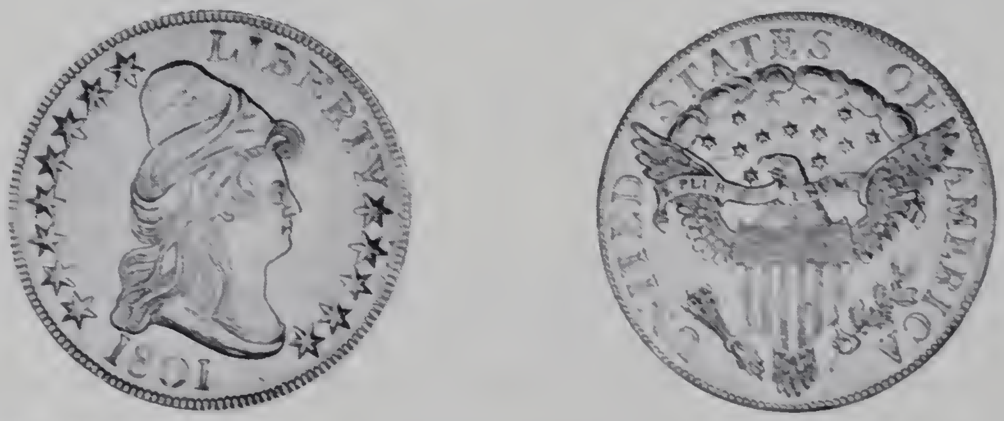
Authorized by the Mint Act of 1792, the Eagle had not been one of the favorites of the people. During this time, more European gold was circulating in this country than $10 Gold, of which none were of equal value. Bankers seldom ordered eagles from the mint for that reason-this is the justification of the lower mintage and scarcity of varieties. They were the first issue of gold in the U.S., along with the half-eagles.



2042. 1795 SMALL EAGLE, Breen 1-A, 13 Leaves on branch, **CHOICE MINT STATE-60+**, 1st year of issue. Stars 10 x 5. Full mint lustre, with almost full proof-like fields. Polishing marks and very lt. die adjustment marks noted. Lt. bagmark between "E" and "R" of AMERICA. Lt. mark below 1st leaf. No wear noticeable. Almost all breast feathers struck up. Of the few times, these coins have appeared in auctions in this condition, they have almost always set record prices. This specimen, far superior than WGC specimen (AU-55), David-Graves (AU-50), Melish (MS-60) and even the two specimens in the Beck Sale (MS-60). Equal in clarity and beauty to the 1976 ANA specimen at $17,000. Ex: King Farouk-Palace Sale, Kosoff. We are confident that a new record price will now be set for this remarkable specimen.



2043. 1796 Breen 1-A, Stars 8 x 8, branch with 11 leaves, **Extremely Fine-45,** Proof-like surfaces, bold strike die mark below 3rd leaf from right and end of branch near letter "A" in AMERICA. Lt. marks on surface and some wear but no evidence of die adjustment marks which are common on early gold coins. Actually, rarer date than 1795. Ex: Col. James W. Flanagan Coll. 1944. An attractive specimen which could exceed its catalog value of 5,500.



2044. 1801 HERALDIC EAGLE, Breen 2-B, wide date, "L" away from cap, 8 x 5 stars, **About Uncirculated-50,** Bright golden colour. Wear on high spots. Lt. hairlines throughout, and lt. rim bruise below 1 in date.

$20 CARSON CITY "CC" GOLD COLLECTION

The following consignment of C.C. double eagles is from a collector who has been collecting for over ten years, trying to acquire the best condition pieces. In all his efforts, through most major dealers and auctions, it was brought out that most of the following coins do not exist, or were not offered in better condition.

These coins, as is the case with all gold coins, are prone to bagmarks and abrasions. They are more obvious on large coins due to their size. The following coins are, of course, the best the collector could find, so many are far and above average.

The potential for future growth is excellent, analyzing the past and present markets.

We hope you will get as much pleasure owning some of these precious coins, as it was our pleasure to catalog them.

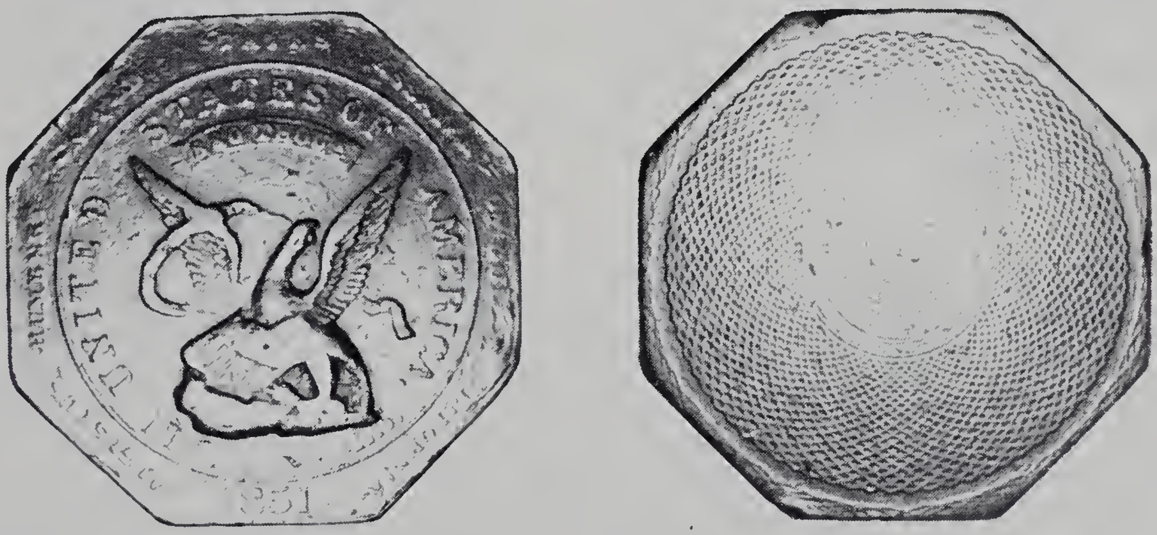
PROVISIONAL U.S. MINT 1851-1853

From 1851 until 1853, the United States Government ran a provisional mint in San Francisco, in lieu of a branch mint whose propriety was being debated in Congress. During the first few months of operation, Augustus Humbert acted as the U.S. Assayer while Moffat & Co. issued the coins. Humbert affixed his name on all these coins until the formation of the U.S. Assay Office of Gold in 1852. From then, until its closing in 1853, with but one exception, the phrase United States Assay Office of Gold was substituted for Augustus Humbert United States Assayer of Gold California.

The coinage of this series is unique in numismatics; never before has a mint operated so much like a branch mint without being identified as such. These pieces should properly be included with the regular U.S. coinage, and as such, include in the U.S. type sets.



2220. 1851 QUINTUPLE EAGLE or $50 GOLD "SLUG", Reeded Edge, AUGUSTUS HUMBERT UNITED STATES ASSAYER OF GOLD CALIFORNIA around obv. margin (near edge) with UNITED STATES OF AMERICA FIFTY DOLLS. inside circle and eagle in center, **880 THOUS.** above. Target reverse. **Fine but approaching Very Fine** in some details; however part of the outer legend is a bit weak in some areas. A defect (mounting?) has been repaired at 4 o'clock edge. The reverse is rather attractive with wear commensurate with grade, but close examination reveals a small repair at 11 o'clock edge next to a small bruise; tiny nick at 3 and 7 o'clock edge. Popular. Cat. Fine $3,000; this worth?

2221. 1852/1 $10, UNITED STATES OF AMERICA TEN DOLS. around eagle with **884 THOUS.** above. Rev. AUGUSTUS HUMBERT UNITED STATES ASSAYER OF GOLD CALIFORNIA 1852 in tablet. 2224. 1853 $20, **884 THOUS.** similar in type to above $10. Ex: New Netherlands from a Numismatist ad 8/69 as: "**Very Fine, reverse closer to EF.** With a minor obv. rim abrasion, a more noticeable rev. rim bruise, and a few rev. handling nicks. Extremely rare, probably less than a dozen examples known.EXTRA SPECIAL @ $1,390.". However, there is a deep "X" cut into the lower reverse extending up about 40%. Cat. VF $6,000; this worth? Same die characteristics on rev. as the $20 1853, 900 Thous. which follows. The $20 884 is a major private gold rarity. They were struck for only 8 days from 2/23/53 to 3/1/53, when the USAOG proceeded to issue over 2½ million .900 fine coins. It is not surprising that so few pieces are known. Regardless of what this specimen brings, the new owner will have the satisfaction of knowing that he possess' one of the classic pioneer gold rarities.

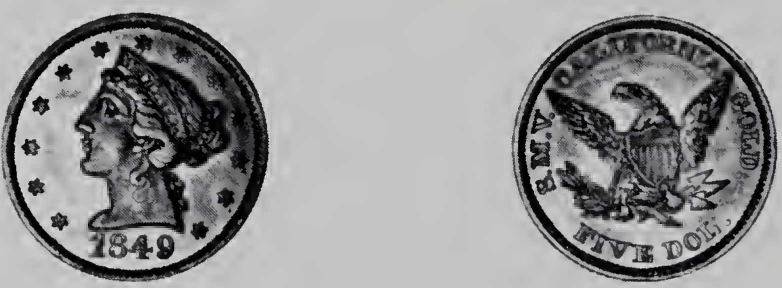
2226. 1853 $20, Liberty Head with MOFFAT & CO on headband; SAN FRANCISCO CALIFORNIA TWENTY D. on rev. Sharpness of **VF-25** but has abrasions: Obv. severly cleaned and buffed to remove the major defects, leaving only the smaller ones, edge "rubbed down" (both sides) to remove nicks. Rev. has long scratches horizontally across top with some short ones vertically above stars. Actually, more attractive than the impression given by the factual description. Cat. Fine 950.

This was the last U.S. Assay Office issue and was struck AFTER Mr. Moffat retired from the Assay Office.

MOFFAT & CO.

John Little Moffat along with his partners, J.R. Curtis, S.H. Ward, and P.H. Perry ran the most respected coining establishment in San Francisco from 1849 through 1852. As evidence of their high regard, the United States government contracted with them to run the U.S. Assay Office from 1851 until the latter was dissolved in 1853.



2227. 1849 $5 Liberty Head with MOFFAT & CO. on headband; S.M.V. CALIFORNIA GOLD FIVE DOL. around eagle. **Choice BU-60+**, original orange-yellow lustre, smooth surfaces but soft struck center, resulting in hair and company name being flatly struck on obv. and eagle flatly struck on rev. Cat. 1,900.

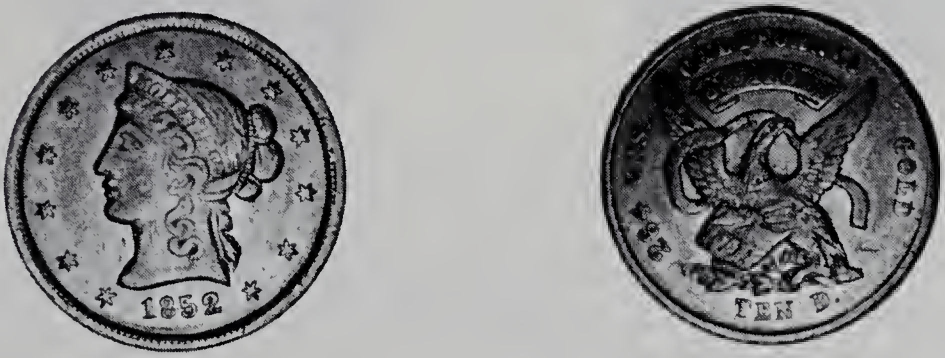
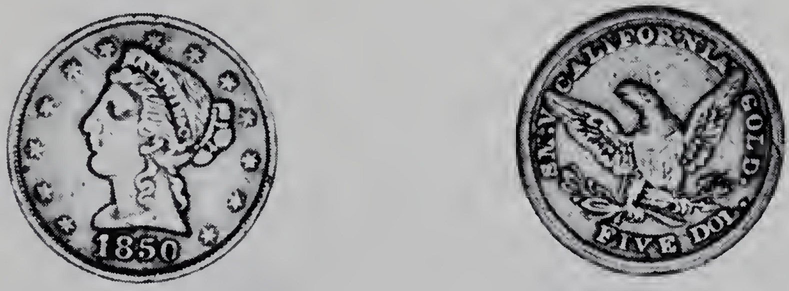
2230. 1850 $5, Small Eagle, **EF-45** sharpness but cleaned, grainy surface, lt. marks. Cat. EF $1,200; this worth?



2231. 1852 $10, Wide Uneven Date, TEN D. VF-20 obv., **F-15** rev. Lt. marks with larger ones on eagle's breast and rt. field. but otherwise a nice appearing coin in spite of weakness on rt. rev. Cat. F $900 & VF $1,600, Only 30,000 said to have been issued.

BALDWIN & COMPANY

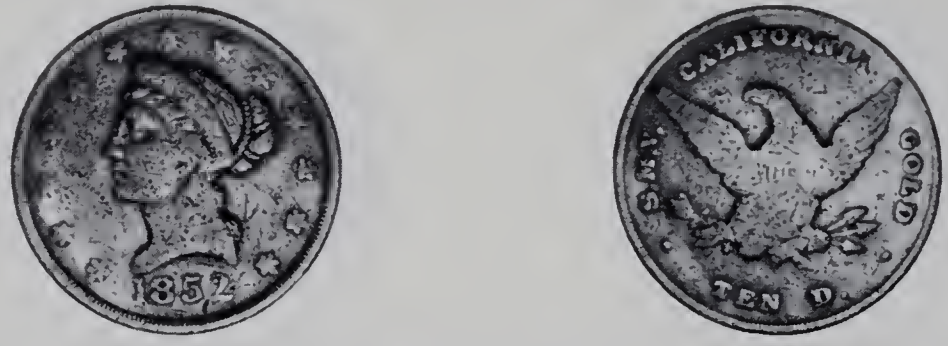
This partnership operated in San Francisco from May 1, 1850 until April, 1851 and issued well over a million dollars in $5, $10, and $20 gold pieces. They enjoyed widespread public confidence until an assay report published in the local newspapers revealed that their coins were badly debased. Baldwin's coins were immediately sent into the assay office to be melted, thus explaining their great rarity.



2232. 1850 $5, BALDWIN & CO on headband; S.M.V. (Standard Mint Value) CALIFORNIA GOLD FIVE DOL. rev. Final "A" in CALIFORNIA repunched over inverted A. **VF-25 obv/VF-20 rev.,** nice strike and fairly even wear, lt. marks, bold date. VERY RARE (R-6)! In strong demand as the "most reasonable of the Baldwin pieces". Cat. VF 2,750.

WASS, MOLITOR & COMPANY

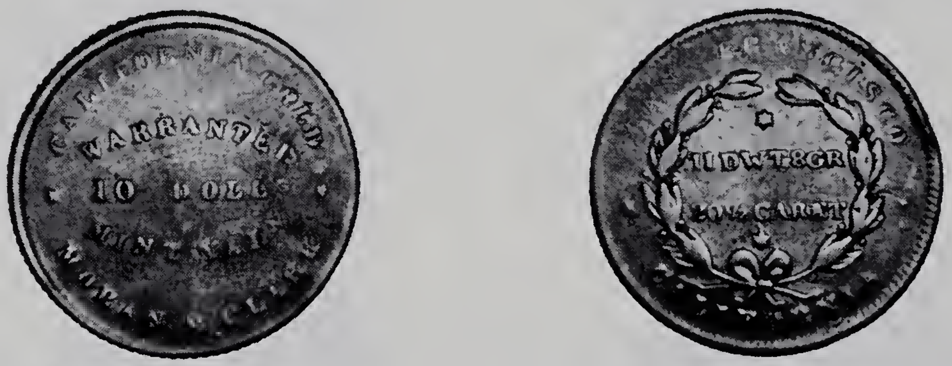
These Hungarian political refugees responded in January, 1852 to the desperate need in San Francisco for gold coins under $50 denominations. The firm's products were among the finest private gold issued in California and intermittently issued coins through 1855.



2233. 1852 $10, **RARE SMALL HEAD!** Second 1 (1851) drilled out of die and replaced with a 2. **Fine-12** with center reverse not as sharp (as is usual for this rarity). Rev. from same die as Dubosq & Co. $10, probably accounting for its impressions sometimes not being clearly discernable. **EXTREMELY RARE** (Rarity 7) WITH ONLY 3 KNOWN OUTSIDE MUSEUMS! Should exceed the modest catalog of 2,000.

MORAN & CLARK - CALIFORNIA

Very little is known concerning this company, whose only numismatic contribution are a few extremely rare patterns. Dan Moran and John C. Clark, originallly from New York, made their way to Sacramento in 1849. Like several other firms, they presumably struck trial pieces from dies made in the East and discarded the heavy coining equipment on their journey West.



2234. (1849) $10, Copper gold plated trial striking (none known in gold or silver). Obv. WARRANTED/10 Dolls/ MINT VALN. center, CALIFORNIA GOLD around top, MORAN & CLARK below. Rev. SANFRANCISCO above CALIFORNIA below a wreath, 11 DWT 8 GR/20½ CARAT (2nd A over E) in center. **Fine-15,** usual uneven wear. Surprisingly well-centered (most of the few known come off-center). A few lt. marks but no major impairments.

The importance of this coin cannot be over-emphasized. So rare is it that although it is considered the product of a private gold coining company, the firm is not even mentioned in the Guide Book of the United States Coins(although it is listed in the more comprehensive Scott Encyclopedia of United States Coins, but not priced due to rarity). Of the 6 known specimens, ONLY TWO ARE OUTSIDE OF MUSEUMS, OR NOT IMPOUNDED!.

UTAH AND THE MORMANS

Under the dynamic leadership of Brigham Young, the Mormon community of Deseret (later to be known as Utah) converted the California and Colorado gold dust into locally circulating coins. The Mormon coins were so badly debased that they rarely circulated outside the Mormon community, but instead were melted. These coins and their surrounding story represent one of the most fascinating numismatic periods of our nation.

CLARK GRUBER & COMPANY — Colorado Gold

This prolific Denver coiner opened in July, 1860 to capitalize on the Colorado gold rush. They struck $2½ to $20 gold pieces in 1860 and 1861, until the Government purchased their operation in 1862, forming the United States Assay Office. The corporate successor to the company was the First National Bank of Denver, which remains in operation today.

ALASKA GOLD

These small gold pieces were sold by the M. E. Hart Co. in San Francisco. They were not made in Alaska and not in the years that bear the date. Most were sold as souvenir pieces at the Alaska Yukon Pacific Exposition at Seattle in 1909 and at the 1915 Panama Pacific Exposition. Most are now scarce to extremely rare. All attributed by Burnie numbers, in his book, "Small California and Territorial Gold Coins." All bear Indian heads, unless otherwise noted.

PERSONALIZED INVESTMENT SERVICE

Many auction bidders ask us for advice on how to invest in rare coins. Collectors who are building specific collections often ask which dates to buy first, or which condition of coin is best for them to obtain, etc. Other bidders ask us simply for the "best opportunities for investment."

In response to these requests, we have developed the Kagin Numismatic Investment Program — a program which differs from all others.

You receive the personal attention and service of A.M. (Art) and Don Kagin who work with you to develop an individually-designed program that will meet your specific needs.

A.M. Kagin is a professional numismatist who has been active in numismatics for more than 50 years.

Don Kagin is the recipient of the first degree conferred in numismatics.

We will personally service your account, making suggestions for acquisitions and making sure your collection meets your individual needs.

Kagin's is particularly noted for:

U.S. currency—We edit and publish the **Donlon Catalog of Large Size U.S. Currency 1861 to 1923.** Our currency Investment Program includes only **Choice** and **Superb** Notes selected from the largest inventory of U.S. Currency available.

Pioneer and Territorial Gold—Don Kagin is currently writing the book that will be the new guide for Pioneer and Territorial Gold. When the book is published, rarity ratings will be drastically changed on a number of coins, and there will be fewer "bargains" available.

Whether you wish to collect specific coins or to make general investments, our Investment Program offers you the following additional services:

Inclusion in Keogh Retirement Plans and Individual Retirement Accounts
Pension Funds
Numismatic Tax Counseling
Personal Consultations
Personalized programs designed to fit your individual needs.
